Electromechanical Thermostats

Termec room thermostat

Size	Pcs./Pack	Code
230V/24V 3 contact	1	02001012
230V 3 contact with LED	1	02001014
230V 3 contact with LED & ind. switch*	1	02001016
230V 3 contact with LED & on-off switch	1	02001018
230V 2 contact with LED & heating/cooling/off switch	1	02001020

The Termec range offers a value-for-money solution to temperature control of underfloor heating circuits. Features include: robust design and compact size 90mm x 90mm x 40mm, 230V operation (24V on 02001012 only), temperature range 5°C to 30°C, temperature differential 1.4°C, on-off and heating-cooling switch options.

* 02001016 has an on-off switch which can be wired independently of the thermostat contacts. For wiring diagrams, please see our website (www.emmeti.co.uk).

Electromechanical dial operated room thermostat

Size	Pcs./Pack	Code
230V / 24V 3 contact	1	U9132100
230V 3 contact with LED	1	U9132110
230V 3 contact with LED & on-off switch	1	U9132120
230V 3 contact with LED & heating / cooling switch	1	U9132130

Like the Termec this electromechanical thermostat range offers excellent value for money coupled with elegant styling to match the other electronic thermostats in the range. Its performance features include: small size 85mm x 85mm x 31mm, reduced temperature differential <1°C, temperature range 8°C to 30°C, on-off and heating-cooling switch options, simple dial operation and changeover contacts. The U9132100 model may also be used for 24V applications. For wiring diagrams please see our website (www.emmeti.co.uk).
